ANSHIKA BHANOT

London, UK | +44 7723705401 | anshikabhanot03@gmail.com | LinkedIn | GitHub | Portfolio

SUMMARY

Data Analyst with experience using SQL, Python and Snowflake to analyse large datasets, build KPI reporting and uncover trends across customer, transaction and market data. Skilled in data analysis, business intelligence, dashboarding, data validation and statistical analysis, with experience translating business questions into actionable insights. Bridging the gap between non-technical stakeholders and data, turning business questions into data-driven solutions and communicating the findings through clear storytelling that supports decisions.

EDUCATION

MSc Business Analytics | Bayes Business School, City, University of London *Sept 2025 – Sept 2026*

Machine Learning · Deep Learning · Advanced Predictive Analytics · Data Management Systems · Data Visualisation · Revenue Optimisation & Pricing · Network Analytics

Bachelor of Commerce | University of Delhi *Nov 2021 – Jul 2024*

Business Mathematics & Statistics · Financial Management · Investment Fundamentals · Economics

EXPERIENCE

Data Analyst | XChange Markets *Jun 2024 – Aug 2025*

- Analysed, cleaned and transformed user, trading and market data using SQL in Snowflake, tracking 10+ KPIs including active users, trading volume, revenue, conversion and retention to identify trends and support data-driven business decisions.
- Used Python alongside SQL to analyse 100K+ user and transaction records, conducting cohort, segmentation and time-series analysis to understand customer behaviour, market activity and business performance.
- Built and automated recurring reporting and dashboards across user, market and transaction data, reducing manual reporting effort by approximately 30% and providing stakeholders with a consistent view of key performance metrics.
- Investigated performance across 50+ markets, analysing trading volume, participant activity, transaction frequency and revenue to identify performance drivers, anomalies and areas requiring further investigation.
- Worked with stakeholders to translate business questions into analytical requirements, validate underlying data and communicate findings clearly to non-technical audiences.

PROJECTS

MND Assistive Response System | Rolls-Royce & Bayes Business School *2026*

- Developed an AI-assisted communication system combining structured response templates, retrieval-augmented generation (RAG) and voice context for people with MND.
- Designed and tested a five-option response framework, achieving 98.4% routing accuracy across 61 curated questions and 100% contract validity across the gold set and 32-question evaluation sweep.
- Created 78 automated tests covering routing, response structure and edge cases to improve system reliability.

Fraud Detection System *2026*

- Built a cost-sensitive fraud classifier on 284,807 credit-card transactions (0.17% fraud), comparing Logistic Regression, Random Forest, XGBoost and Isolation Forest, with PR-AUC as the main metric.
- Set the decision threshold by minimising expected loss under assumed costs (25 per false alarm vs 2,500 per missed fraud) instead of using 0.5. XGBoost reached PR-AUC 0.87, ROC-AUC 0.98, 89% recall and 63% precision on a stratified hold-out set.
- Deployed a Streamlit app that scores transaction CSVs, with an adjustable threshold and flagged-transaction view.

TECHNICAL SKILLS

Languages & Analytics: Python, SQL, Excel, NumPy, Statsmodels
BI & Visualisation: Power BI, Tableau, Streamlit
Data & Cloud: Snowflake · PostgreSQL · SQLite · Git · Docker
Machine Learning: XGBoost, TensorFlow/Keras, Feature Engineering, Predictive Modelling, Classification

ADDITIONAL INFORMATION

Vice President | Zeal Dance Society *Nov 2021 – Jul 2024*

- Led budgeting, operations and vendor coordination across multi-event programmes, managing resources for 30+ members.
